SKILLS

JavaScript, React.js, Redux.js, Node.js, Ruby, Ruby on Rails, HTML5, CSS3, SQL, PostgreSQL, MongoDB, Express.js, Git, AWS, Python, MVC, AJAX, Web Services, OOP, Visual Studio, HTTP

PROJECTS

YimYum (Rails 5, Ruby, ReactJS, PostgreSQL, Redux, AWS)   Git | Live

Single-page web application with a TikTok inspired design where users can upload their satisfying food videos.

- Developed frontend to backend user authentication that uses BCrypt and Protected Routes to securely save encrypted passwords for optimal scalability.
- Integrated Redux with HTML5 media web components to create customized media playback for users.
- Connected Rails backend to AWS S3 for media storage while maintaining content security with AWS IAM.
- Produced custom UI using CSS and user-centered design techniques, improving usability and user retention

Trippt (MongoDB, Express, ReactJS, NodeJS)   Git | Live

A single page application that allows users to add trips, select destinations, choose activities for their itinerary.

- Integrated Tripadvisor API by utilizing asynchronous Axios calls to fetch real-time data to ensure reliable and up to date information for users.
- Utilized Git workflow in a team setting to cooperate efficiently and peer-reviewed pull requests to minimize merge conflicts.
- Employed CSS3 flexbox and z-index to build responsive carousels to enhance user experience.

Stop The Spread (React.js, Node.js, JavaScript, HTML5, CSS3)   Git | Live

COVID-19 themed responsive drag and drop kanban board completed in two days for MintBean Hackathon.

- Built core drag and drop with react-beautiful-dnd for accessible, high-performing, natural moving components.
- Incorporated styled components for dynamic styling, simple maintenance and automatic critical CSS.
- Utilized React Hooks for efficient, simple state management and easy code readability in a team environment.

EXPERIENCE

Quality Assurance Tester

Tilt Access   Nov 2020 - Present

- Developed and executed testing plans to find defects in software and pinpoint functionality and design issues
- Established and enforced quality assurance measures and testing standards for cross-browser support.
- Utilized Notion and SmartBear's CrossBrowserTesting to track the status of defects and provided a status report during weekly meetings

Search Engine Specialist

Didit   Nov 2017 - Oct 2019

- Performed daily account management and optimization tasks based on KPIs for various clients' paid search accounts in Google AdWords and Bing Ads.
- Generated daily and weekly client reports for all major metrics, goals tracking, revenue tracking, and other paid search initiatives.
- Launched 50+ new paid search campaigns, ad groups, and accounts and supported creation of new paid search marketing initiatives across the agency's client roster.
- Collaborated with team members and management on project development, timelines, and results.

EDUCATION

Web Development - *App Academy | Spring 2020*
Bachelor of Arts - *University of Virginia | 2012 - 2016*
